Jon Fiutak  
General Manager  
Anthony Hardwood Composites, Inc.

Mr. Fiutak,

I have reviewed the documents you forwarded describing your supplier's process for kiln drying the lumber your company (Anthony Hardwood Composites, Inc) uses in manufacturing your mats and platforms in your facility in Sheridan, AR.

It is obvious to me that this process meets ISPM 15 standards for solid wood packing material (heat treatment of debarked lumber reaching a core temperature of 56C for minimum of 30 minutes).

Joel W. Bard  
State Plant Health Director - Arkansas
